RE: An Update to Our School Menus Platform
DATE: August 26, 2026

We are excited to share an upcoming change to the way you access our school menus online and through a mobile app.

SFE will be transitioning from **Nutrislice to LINQ Solutions** for our online menu and mobile app services. This change will enable us to bring our menu services together with the technology we already use behind the scenes.

LINQ has been an SFE partner for several years, using their back-of-house software to support our food service operations compliance and, in many cases, your trusted Point of Sale provider. This transition now integrates our online menus and mobile app for a cohesive, efficient operating system with LINQ.

What This Means for You?

This change will take effect beginning with September menus. On August 31, your school's menus will be available through LINQ's menu platform.

Prior to this date, **you will receive a new menu link for your school**. Our teams are currently working with your technology teams to update your Nutrislice link on the food service webpage with the new LINQ menu link so families and nurses can continue to find your menus without interruption.

We appreciate your patience and support as we make this improvement. We believe bringing these services together will create a better experience for our students, families, and school communities.

Thank you for being a valued part of the SFE community.
