CORRECTION

Checked over the machine and noted several issues. The battery is bad and is not holding a charge. The alternator is bad and is not charging the system. The starter is not hitting every time and needs to be replaced. The mower deck will not engage due to the battery not having enough juice to allow the PTO clutch to work, unit will work while on a battery charger. Tested the hydraulic pressure and found it to be under spec. Hydraulic pump gets hot while running and shows signs of wear due to age. The deck lift cylinder is leaking internally and not allowing the deck to stay up in the air. Checked over the rear transaxle and found that it was leaking and appears to be cracked where the two housings meet. Unit needs to be serviced and have all hydraulics flushed to remove debris so as to not damage new parts. Quote is for repair of unit. Quote could change depending on what is found once the unit gets apart. For the price of repair and the hours/age on the unit, repair is not recommended. Replace unit with new if possible.
